DETAILED ACTION

1. Claims 27-35 are pending in this application.

Election/Restriction

2. Applicant's election without traverse of Group I (i.e. Z = pyridine) in the reply filed on 12/08/2008 is acknowledged.
3. The claims are drawn to multiple inventions for reasons set forth in the restriction requirement. The claims are examined only to the extent that they read on the elected invention. Cancellation of the non-elected subject matter is recommended in response to this Office Action.

Information Disclosure Statement

4. Applicant's Information Disclosure Statement, filed on 02/08/2005 has been acknowledged. Please refer to Applicant's copies of the 1449 submitted herewith.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 27 and 35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

a. Claims 27 and 35 are rejected because the phrase "optionally substituted aryl" is indefinite. In the absence of the specific moieties intended to effectuate modification by the "substitution" or attachment to the chemical core claimed, the term "substituted" renders the claims in which it appears indefinite in all occurrences wherein applicants fails to articulate by chemical name, structural formula or sufficiently distinct functional language, the particular moieties applicants regards as those which will facilitate substitution, requisite to identifying the composition of matter claimed.

b. In claim 27, the term "hydrocarbon" is not clear. What is covered and what is not? Hydrocarbon literally implies any substituent with carbon and hydrogen. Are there any heteroatoms present in the hydrocarbon? It is recommended that applicants recite specific hydrocarbons to overcome this rejection.

c. In claim 35, the phrase "heterocyclic group" is indefinite. What is the size of the ring? What is the number and nature of the heteroatoms? Can the ring be fused or spiroconnected to another ring, and if so, what kind of ring? Can the ring be bridged? Unsaturated? Cf *In re Wiggins*, 179 USPQ 421, 423.

Objection

6. Claims 28-31 and 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Allowable Subject Matter

7. Claims 32-33 are allowed.
